

Chelone glabra

White Turtlehead

A great plant for moist spots, with white flowers (often tinged purple) shaped like the heads of turtles above dark green foliage. Will thrive planted in wet meadows, or next to streams or ponds, but also does fine in ordinary garden soil as long as it doesn't get too dry. Self-seeds.

Suggested companions: swamp milkweed (*Asclepias incarnata*), sneezeweed (*Helenium autumnale*), blue vervain (*Verbena hastata*), cinnamon fern (*Osmunda cinnamomea*).
